

Proposal for a Research Study to Advance Racial Equity

What is your name and what organization are you representing?

What is your research idea? It do not need to be well developed as we will likely refine it together.

How will this research support your advocacy work for racial equity? Who else might find this research to be useful to their work?

If you have any ideas about how this project can be done, please share what you have envisioned.

What timing would work for you? When does the project need to be completed? Why is this date important?

What funding do you have available for this work? Some contribution is important, though we can often find a way to cover this by CARE.

How can we reach you? Please provide both email and phone.
